## **2 Key to notations in this manual.**

**Keywords** – Terminology that relates to menus, icons, buttons or functions of the Sola-Sure.

**F1/2 (Function) Key** – When referring to either the *F1* or *F2 Key*, the text in the brackets indicates the text that is displayed on the Sola-Sure screen above the relevant key to indicate its function.

**Main Screens** – The main screens are the screens that display information about the scan, namely the *Total UVR*, *UVB*, *UVA*, *UVA1*, *UVA2*, *Te Time: FDA/CDEH* and *Te Time: CIE/IEC* screens.

### **3 Sola-Sure Terminology**

#### **3.1 Stray Light**

*Stray Light* is optical noise, light that has entered an optical system and taken a different path to the path that was expected.

#### **3.2 Stray Light Compensation**

*Stray Light Compensation* is a method of removing the *Stray Light* from the reading taken by the Sola-Sure to ensure that the data presented only represents the light of interest.

#### **3.3 Erythmal Action Spectra**

The *Erythmal Action Spectra* defines the skins response to UV Light.

#### **3.4 MED**

The Minimum Erythema Dose.

#### **3.5 Te Time**

The *Te Time* is the maximum recommended exposure time (and maximum timer interval).<sup>1</sup>

#### **3.6 Auto-Ranging Scan**

A feature of the Sola-Sure that calculates the required *Intensity Range* needed to take a reading of a lamp without the reading *saturating*.

---

<sup>1</sup> Reference : FDA Document 21 CFR 1040.20

## **4 What Information Does the Sola-Sure Display and What Does It Mean?**

### **4.1 Areas**

The Sola-Sure will calculate five *Energetic Area* readings, four of which are customisable. The default ranges are:

<b>Name</b>	<b>Range</b>	<b>Customisable</b>
Total UVR	280-400 nm	No
UVB	280-320 nm	Yes
UVA	320-400 nm	Yes
UVA1	340-400 nm	Yes
UVA2	320-340 nm	Yes

The *Energetic Area* readings give the *Power per Unit Area (mW/cm<sup>2</sup>)* that radiates on the Sola-Sure (and ultimately the person in the sun bed). These readings are not *Erythemally* weighted.

### **4.2 Te Times**

The Sola-Sure calculates two *Te Times*, one based on the *FDA/CDRH Erythemat Action Spectra* and *MED denominator* and one based on the *CIE/IEC Erythemat Action Spectra* and *MED* value.

The *Te Time* is the maximum recommended exposure time (and maximum timer interval). It is defined as the time taken to reach  $4 \times \mathbf{MED}$  for an un-tanned Type II skin (always burns, then tans slightly).<sup>2</sup>

---

## 5 Sola-Sure Buttons and Icons

### 5.1 Buttons

Button	Name	Purpose
F1	<i>F1 Key</i>	Enter menu when not in a menu. Select a menu option when in a menu.
F2	<i>F2 Key</i>	<b>Print</b> current data to printer when not in a menu. Navigate a menu level up when in a menu.
	<i>Up Key</i>	Scroll up through either readings or menus
	<i>Down Key</i>	Scroll down through either readings or menus
	<i>Memory Key</i>	None
	<i>Scan Key</i>	Quick press – <b>Scans</b> the sensor using the current intensity range. 2 second press – Performs an <b>Auto-Ranging Scan</b>
	<i>Power Key</i>	Switches the Sola-Sure on and off.

### 5.2 Icons

Icon	Name	Purpose
	<i>Battery Icon</i>	Displays the current charge status of the battery and indicates when the battery is charging.
	<i>Stored Data Icon</i>	Indicates that the information displayed on the screen relates to the <b>Stored data</b> .
	<i>Arial Icon</i>	Indicates how close to <b>saturation</b> the previous <b>scan</b> was.
	<i>Clock</i>	Displays the time during normal operation and the time left for the <b>scan</b> to finish when the Sola-Sure is scanning.

## **6 Using the Sola-Sure**

### **6.1 Switching the Sola-Sure on and off.**

The Sola-Sure can be turned on and off by pressing the *Power Key*. The Sola-Sure will take a few seconds to start up. Once on, the Sola-Sure will power off immediately by pressing this key.

### **6.2 Viewing the current reading**

When the Sola-Sure is switched on the first screen will display the *Total UVR* reading, to view the *Areas* and *Te Times* press the *Up* and *Down Keys*.

### **6.3 Printing the current reading**

With the optional thermal printer attached, from any of the main screens, press the *F2 (Print) Key* and the current data will be printed.

### **6.4 Scanning with the Sola-Sure**

To perform a standard scan press the *Scan Key* and the Sola-Sure will start *scanning* using the current settings. To perform an *Auto-Ranging Scan*, press and hold the *Scan Key* for two seconds.

(For more information on scanning see the “Taking a reading with a Sola-Sure” chapter.)

### **6.5 General Menu Navigation**

Navigating the menu structure of the Sola-Sure is designed to be very simple and only uses the *F1*, *F2*, *Up* and *Down Keys*. The *Up* and *Down Keys* scroll through the currently displayed menu. The *F1 (Select) Key* will change to the currently selected menu item (that could be another menu or a setting option) and the *F2 (Back) Key* will navigate up a menu level taking you back to the previous menu. To enter the menu system, press the *F1 (Menu) Key* from any of the main screens.

## **7 Stray Light Compensation**

Stray Light Compensation is a feature that removes Stray Light from the reading taken by the Sola-Sure and requires no user interaction.

By default the Sola-Sure will have **Stray Light Compensation** set to **Solarium Mode** and the **Stray Wavelength Limit** set to 295nm, although it is possible to alter these settings it is not recommended.

### **7.1 Enabling/Disabling Stray Light Compensation**

- From any on the main screens press the **F1 (Menu) Key**.
- Scroll through the menu until the **Settings** menu item is highlighted and press the **F1 (Select) Key**.
- Scroll through the menu until the **Stray Light** menu item is highlighted and press the **F1 (Select) Key**.
- Scroll through the menu until the **Stray Mode** menu item is highlighted and press the **F1 (Select) Key**.
- There are now two menu items in the menu displayed.
  - To enable **Stray Light Compensation**, select the **Solarium Mode** menu item.
  - To disable **Stray Light Compensation**, select the **OFF** menu item.

### **7.2 Stray Wavelength Limit Setting**

- From any on the main screens press the **F1 (Menu) Key**.
- Scroll through the menu until the **Settings** menu item is highlighted and press the **F1 (Select) Key**.
- Scroll through the menu until the **Stray Light** menu item is highlighted and press the **F1 (Select) Key**.
- Scroll through the menu until the **Wavelength Limit** menu item is highlighted and press the **F1 (Select) Key**.
- Use the **Up** and **Down Keys** to alter the **Wavelength Limit** to the required value and press the **F1 (OK) Key** to confirm the setting.

## 8 Taking a reading with a Sola-Sure

### 8.1 Scan Settings

#### 8.1.1 Intensity Range

The **Intensity Range** settings sets the maximum **Intensity** that the sensor can read before **saturation** occurs. Set the **Intensity Range** to value just above the peak output **Intensity** of the lamp to be measured for optimum performance. If the peak output **Intensity** of the lamp is unknown an **Auto-Ranging Scan** may be performed (see later).

(NOTE – The lower the **Intensity Range** the longer the **Sample Time**.)

#### 8.1.2 Optimisation

The **Optimisation Level** sets the number of scans taken by the Sola-Sure during a single reading to improve the accuracy of the lower **Intensity** sections of the spectrum. The **Optimisation Level** can be set from 1 to 7, each scan taking half the time of the scan before it. The first scan will take  $sample\_time \times (2^{(optimise-1)})$  seconds, the second (if there is one) will take  $sample\_time \times (2^{(optimise-2)})$  seconds and so on.

For example if the **Intensity Range** set gives a 1 seconds **Sample Time** and the **Optimisation Level** is set to 3 then the overall maximum **Sample Time** will be:

$$(1 \times (2^2)) + (1 \times (2^1)) + (1 \times (2^0)) = 4 + 2 + 1 = 7 \text{ seconds.}$$

This is a maximum **Sample Time** because if the first scan does not **saturate** then the Sola-Sure will not take any more readings as it already has all the data it needs.

As a general rule, the shorter wavelength accuracy can be improved by increasing the **Optimisation Level**. A faster reading can be obtained by reducing the **Optimisation Level**. The default **Optimisation Level** is 5.

### 8.2 Taking a Standard Scan

A **Standard Scan** will scan using the currently set **Intensity Range**.

- To take a **Standard Scan** simple press the **Scan Key**.
- The **Clock** icon will count down the number of minutes and seconds left before the scan finishes.
- When the scan finishes the three LEDs on the front of the Sola-Sure will flash twice.

### 8.3 Taking an Auto-Ranging Scan

An **Auto-Ranging Scan** is used to set the **Intensity Range** of the Sola-Sure if the required **Intensity Range** is not known.

- To take a **Auto-Ranging Scan** simply press and hold the **Scan Key** for two seconds.

- The ***Clock*** icon will disappear for a few seconds while the Sola-Sure calculates the required Intensity Range.
- The ***Clock*** will then display the number of minutes and seconds left before the scan finishes.
- When the scan finishes the three LEDs on the front of the Sola-Sure will flash twice.

(NOTE – Once the ***Intensity Range*** is set using an ***Auto-Ranging Scan, Standard Scans*** can be used for all subsequent scans until the Sola-Sure is moved or the light source is changed.)

## **8.4 Scan Warning Messages and Saturation**

### **8.4.1 Saturation**

If the ***Intensity Range*** of the Sola-Sure is set too low (too sensitive) for the lamp it is measuring then ***saturation*** will occur. ***Saturation*** is the point where the Sola-Sure's detector array has “absorbed” the maximum amount of light it can to take an accurate reading. If a scan does ***saturate*** then increase the ***Intensity Range***. Saturation is indicated by the Sola-Sure displaying “Saturated” instead of a reading on the main screens.

### **8.4.2 Scan Warning Messages – Unable to Compensate for Stray Light**

The Sola-Sure is capable of reading a much wider range than the 280-400nm range it displays. It is possible for ***saturation*** to occur outside this range without the Sola-Sure informing the user. As the ***Stray Light Compensation*** feature accounts for the entire spectrum, if a section outside the 280-400nm range is ***saturated*** then the ***Stray Light Compensation*** feature will not work, the Sola-Sure will indicate this by displaying the following message for 2 seconds at the end of the scan.

<p style="text-align: center;">** Warning ** Unable to Compensate For Stray Light</p>
---

When this message is displayed, increase the ***Intensity Range*** to avoid any part of the spectrum ***saturating*** and the warning will disappear.

## **9 Other Settings**

### **9.1 Customising the Area Ranges**

- From any of the main screens press the ***F1 (Menu) Key***.
- Scroll through the menu until the ***Areas*** menu item is highlighted and press the ***F1 (Select) Key***.
- Scroll through the menu until the area you want to alter is highlighted and press the ***F1 (Select) Key***.
- Select either the ***Min Wavelength*** or ***Max Wavelength*** menu item depending on which you want to alter and press the ***F1 (Select) Key***.
- Use the ***Up*** and ***Down Keys*** to alter the selected area limit and press the ***F1 (Set) Key*** to confirm the changes.

### **9.2 Logging**

The Sola-Sure has the ability to ***log*** each reading it takes to a printer allowing easy data collection.

To enable or disable ***Logging***:

- From any of the main screens press the ***F1 (Menu) Key***.
- Scroll through the menu until the ***Settings*** menu item is highlighted and press the ***F1 (Select) Key***.
- Scroll through the menu until the ***Logging (On/Off)*** menu item is highlighted and press the ***F1 (Select) Key***.
- To enable ***Logging*** highlight the ***On*** menu item and press the ***F1 (Select) Key***, to disable ***Logging*** highlight the ***Off*** menu item and press the ***F1 (Select) Key***.

### **9.3 Continuous Scan and Scan Interval**

The Sola-Sure can be set to automatically scan at a set time interval or scan as quickly as possible. The interval is defined by the ***Scan Interval*** setting and the feature can be activated or disabled using the ***Continuous Scan*** setting.

To set the ***Scan Interval***:

- From any of the main screens press the ***F1 (Menu) Key***.
- Scroll through the menu until the ***Settings*** menu item is highlighted and press the ***F1 (Select) Key***.
- Scroll through the menu until the ***Scan interval*** menu item is highlighted and press the ***F1 (Select) Key***.
- Use the ***Up*** and ***Down Keys*** to select the required ***Scan Interval*** and press the ***F1 (OK) Key*** when the required interval is set.

(NOTE – A ***Scan Interval*** of 0 minutes will set the Sola-Sure to scan as quickly as possible.)

To enable or disable ***Continuous Scan***:

- From any of the main screens press the ***F1 (Menu) Key***.
- Scroll through the menu until the ***Settings*** menu item is highlighted and press the ***F1 (Select) Key***.

- Scroll through the menu until the *Continuous Scan* menu item is highlighted and press the *F1 (Select) Key*.
- To enable *Continuous Scan* highlight the *On* menu item and press the *F1 (Select) Key*, to disable *Continuous Scan* highlight the *Off* menu item and press the *F1 (Select) Key*.

#### **9.4 Lock**

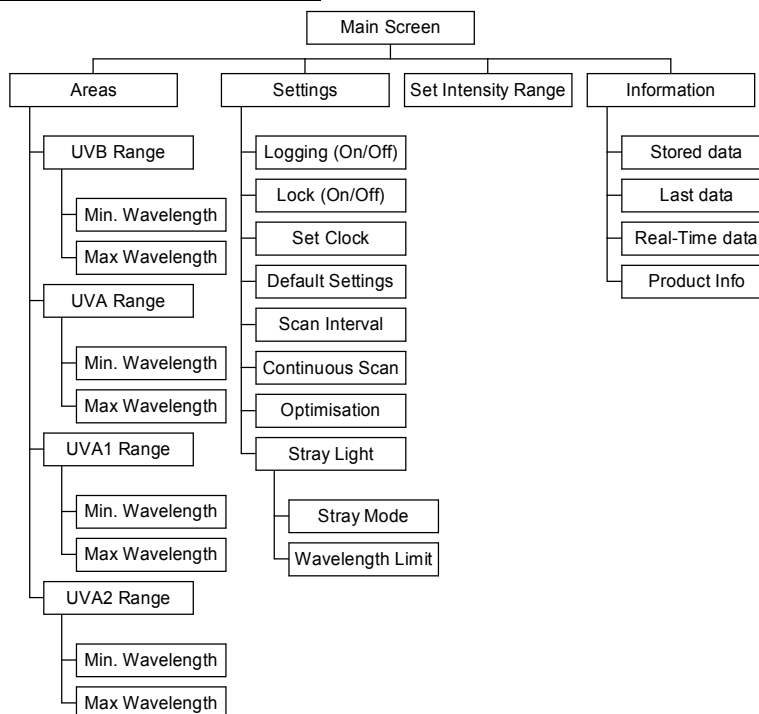

To ensure that no accidental alterations are made to the settings of the Sola-Sure it is possible to enable a lock preventing any changes.

To enable or disable the *Lock*:

- From any of the main screens press the *F1 (Menu) Key*.
- Scroll through the menu until the *Settings* menu item is highlighted and press the *F1 (Select) Key*.
- Scroll through the menu until the *Lock (On/Off)* menu item is highlighted and press the *F1 (Select) Key*.
- To enable the *Lock* highlight the *On* menu item and press the *F1 (Select) Key*, to disable the *Lock* highlight the *Off* menu item and press the *F1 (Select) Key*.

## 10 Appendix A - Menu Navigation and Menus Purpose

### 10.1 Menu Navigation Structure

### 10.2 Menus Purpose

#### 10.2.1 **Areas**

Allows the range limits of the UVB, UVA, UVA1 and UVA2 ranges to be changed.

#### 10.2.2 **Settings**

##### 10.2.2.1 **Logging (On/Off)**

Enables and disables the *Logging* feature.

##### 10.2.2.2 **Lock (On/Off)**

Turns the Settings Lock on and off so that no accidental alterations can be made to the settings.

##### 10.2.2.3 **Set Clock**

Allows the setting of the internal clock on the Sola-Sure

##### 10.2.2.4 **Default Settings**

Resets the settings on the Sola-Sure to their factory default settings.

##### 10.2.2.5 **Scan Interval**

Alters the time interval in minutes between scans when *Continuous Scan* feature is active.

#### **10.2.2.6 Continuous Scan**

Enables and disables the *Continuous Scan* feature for automatic data collection

#### **10.2.2.7 Optimisation**

Alters the *Optimisation Factor* that is used when taking a scan. (See the “Taking a reading with a Sola-Sure” chapter for more information.)

#### **10.2.2.8 Stray Light**

##### *10.2.2.8.1 Stray Mode*

Alters the *Stray Light Compensation* mode. (See the “Stray Light Compensation” chapter for more information.)

##### *10.2.2.8.2 Wavelength Limit*

Alters the *Stray Light Wavelength Limit*. (See the “Stray Light Compensation” chapter for more information.)

#### **10.2.3 Set Intensity Range**

Sets the *Intensity Range* that the sensor will scan at. (See the “Taking a reading with a Sola-Sure” chapter for more information.)

#### **10.2.4 Information**

##### **10.2.4.1 Stored data**

Displays information about the *Stored Scan* data.

##### **10.2.4.2 Last data**

Displays information about the *Last Scan* taken using the Sola-Sure.

##### **10.2.4.3 Real-Time data**

Displays the *Time* and *Date*, *Sensor* and *Probe Temperature* and the currently set *Sample Time*. (NOTE – the *Probe Temperature* will only be displayed if a probe with a *Thermocouple* is attached.)

##### **10.2.4.4 Product Info**

Displays the Calibration due date, Serial Number, Attachment Information, Software version, Hardware version, Wavelength range and Saturation dose for the Sola-Sure.

## **11 Trademarks and Acknowledgements**

Brands and product names mentioned in this manual may be trademarks or registered trademarks of their respective companies and are hereby acknowledged.
